

# PosLink 1.0.3.164

## Release Notes

# Release Summary

## Enhancements

### POSLINK-291 Mews PMS Integration

PosLink now works with the Mews PMS system (<https://www.mewssystems.com/hotels/>). Features supported are guest selection from list view, Posting of items to room and posting of non-room transactions.

New field added to Terminal Configuration to set a default room site ID for each terminal  
New room system type added to interfaces - > rooms

## Fixes

### POSLINK-274 Business date on tax Lines in Journal File

Business date sold logged in Journal incorrectly for Tax Items  
Changed the business date sold in the .JNL files to record the business date the tax was calculated on  
Previously for TAX values the business date in the JNL file would be the associated PLU business date  
Now it's the actual business date the TAX was calculated on

### POSLINK-322 Don't show VAT on rear display

Vat was being shown on rear display for non add VAT sales. It now only shows if the VAT is ADD ON vat and the customer needs to see it.
