Release Summary

Enhancements

POSLINK-245 Clerk selection presented as list on certain functions

On the following functions:

163 - Allocate Clerk Settings

113 - Allocate Biometric Device

193 - Allocate Clerk Pin

52 - Set MagCard / Dallas

It is difficult to find the clerk from the drop down on these screens. To make it easier for the user to select the clerk when "Allow clerk selection" is enabled on the function a list of clerks is now displayed prior to the function screen being displayed. This allows for alpha search and the use of filters from the list.

POSLINK-301 Pepper card authorization before transferring to table / tab from clerk

When using the Pepper integration with PosLink when you transfer a clerk transaction to a table or tab where the clerk transaction has a Pepper customer allocated we now call the Pepper API to update the Order. On the Pepper side this will actually Pre-auth the customer payment card. If it fails due to a timeout, the user gets to retry the process or cancel, any other error is displayed with a cancel button. If cancel is selected the operator cannot send the clerk transaction to the table or tab.

POSLINK-379 Include ability to scan a Pepper Loyalty QR code

Added new option in Mag Card Configuration to enable scanning of Pepper QR Loyalty Code

POSLINK-341 Show preview option added to function 35 send to KPS

Added new option in function 35 Send to KPS to allow preview before sending

POSLINK-338 Option to hide customer info from web order receipts

Added new option in global Flags – Flags 1 – Print Flags 5 to hide customer name and hide customer phone number from the web order receipt

POSLINK-343 Added master terminal to web orders poll terminal

Added new option to the dropdown in global flags – web orders – web orders poll terminal called "Master Terminal". When selected this will use the dedicated master terminal to do the polling for the web orders

Release Summary

POSLINK-387 FeedItBack feedback code format changed

Changed format of FeedItBack code on request from FeedItBack to no longer include 1 or 0 as it was confusing to the customer

POSLINK-370 Engineer option added to send fonts from PosLink to StockLink

Added new engineer option to send fonts from the PosLink to Stocklink so they can be selected on the keyboard designer

Fixes

POSLINK-358 Business date on PLU Discount Lines in Journal File

Business date sold logged in Journal incorrectly for PLU Discount Items
Changed the business date sold in the .JNL files to record the business date the PLU discount is calculated on.
Previously for PLU discount values the business date in the JNL file would be the associated PLU business date
now it's the actual business date the adjustment was calculated on.

POSLINK-388 AdHoc condiments not included in timed event Only Send PLUs with Condiments to KPKV

If Adhoc condiments were added and the timed event was active, "Only Send PLUs with condiments to KPKV then these were not included

POSLINK-389 Incorrect flag description in terminal configuration

Within Terminal Configuration on the POS, The Receipt Text tab contains a tick option labelled 'Override Global Flags'. This has been changed to "Override Printer Text"

POSLINK-390 Check for updates locking up

The function 155 Get till updates was locking up and left the user with no choice but to kill the application.
