Release Summary

Enhancements

POSLINK-406 5Loyalty allocate 4 digit code on opening table

Added new option in Interfaces->5Loyatly to allocate a random 4 digit code when a table is opened.
This can then be used to link a customer to a transaction from the 5Loyalty application
Added new field QRCode format used to define the QRCode example:
http://example.com/page?company={{companycode}}&location={{locationcode}}&trancode={{code}}
Variables are as follows:
{{companycode}} = Company Code
{{locationcode}} = Location Code
{{code}} = 4 digit code
{{poslocation}} = POS Ecr Location

POSLINK-407 New printer text option transaction code

Added new option to printer text program called transaction code. This allows the design of the transaction code print out given to the customer.
You can define variables in the printer text as follows:
{{QRCODE}} – Prints the QR Code
{{TRANSCODE}} – Prints the 4 digit transaction code

POSLINK-408 New function to re-print 4 digit transaction code

Added new option in functions to reprint transaction code (269 – Print Transaction Code)

POSLINK-430 PosLink Verifone Engage certification

Poslink is certified with the Verifone engage platform
EFT type Verifone Engage added to EFT Devices

Fixes

No fixes in the current release
