

# PosLink 1.0.3.167 Release Notes

22/06/2019

# Release Summary

## Enhancements

### POSLINK-469 New function verify customer

Added new function 270-Verify Customer. Used to validate 5Loyalty Customer as a student.

### POSLINK- 470 Provide transaction update to 5Loyalty

On Store/Send and payment, send transaction to 5Loyalty platform.

### POSLINK- 497 Show table info on table plan

Added a new option in global flags – flags3 – Show table info on plan. If this is set then the table info will be shown on the plan when the table plan is loaded by default.

# Release Summary

## Fixes

### POSLINK-428 Employee Benefits - Error correcting points payment type is causing a points balance issue

Fixed issue when error correcting employee points was not refunding the correct points balance back to the EmployeeTransactions table.

### POSLINK-500 Add registry entry to fix windows update crash on web browser

When the .net webbrowser control is used to fix a crash caused by a windows update, we write the following registry keys  
"HKEY\_CURRENT\_USER\SOFTWARE\Microsoft\Internet Explorer\Main" /v "Disable Script Debugger" /t REG\_SZ /d no /f  
"HKEY\_CURRENT\_USER\SOFTWARE\Microsoft\Internet Explorer\Main" /v "DisableScriptDebuggerIE" /t REG\_SZ /d no /f

### POSLINK-433 Medias > Other Currency > Get Rate Button not working

Yahoo finance has pulled the existing currency API. Changed the service to use a new free API (<https://api.exchangeratesapi.io>)  
This change is implemented in EposDataImport Service.

### POSLINK-429 Collins Integration: created\_date issue

When passing in two identical records to stocknetAPI\AddLedgerDepositDetails the second record would be rejected due to the date being used by the method internally.  
To resolve this a new method has been created called AddLedgerDepositDetailsV2 where the date/time can be specified for the deposit.  
This change is implemented in StockNetAPI Service.

### POSLINK-474 Selima Export - Add Tips and EFT Gratuity function values

Tips and EFT gratuity can be added to the totalvalue of the export. You need to add a line to the selimamapings.txt file on the server TIPSSALESGROUP,X where X = the sales group to assign the tips value to. The hour will always be indexed at 0.  
This change is implemented in EposDataImport Service.
