Enhancements

POSLINK-463 SagePay Pay at table and Pay at counter

PosLink now supports SagePay for both pay at table and pay at counter card payments

POSLINK-243 Force complete transactions to send before end of day

Added new global flag Control Options 2 – Complete Zero Transactions at EOD. This will complete all transactions where the outstanding balance to pay is 0.00

POSLINK-566 Added variable names to Printer Text – Transaction Code

Added the ability to use the following variable names in Printer Text for the transaction code.

{QRCODE} = The QR code

{TRANSCODE} = The 4 digit transaction code

{TABLENO} = The table no

{LOCATIONDESC} = The Location Description

{TERMINALDESC} = The description of the terminal

{DATETIME} = Date and Time

{SEATINGAREA} = Seating Area

{POSLOCATION} = PosLink Location

{CLERKDESC} = Clerk Description

{LOCATIONCODE} = Location Code

{COMPANYCODE} = Company Code

Fixes

POSLINK-646 WIFI PED could pick up local track instead of master track

Fixed issue where VX WIFI PED could pick up local track rather than its master counter part

POSLINK-547 Make backup the master ignoring VLAN

Fixed issue when using the function “Make backup the master”. The function was ignoring the VLAN setting, and would not inform other tills of the master change.

POSLINK-560 Restaurant Diary Walk-in Issue

Fixed issue with Restaurant Diary integration if covers changed on the diary the update would fail when completing the transaction.

Added some new fields to the booking info screen to show more detail regarding the booking

POSLINK-664 PosLink stops responding when transaction has very large subtotal

Fixed issue if the sale total was > 99999999.99 then PosLink would stop responding. Added a check to make sure transaction limit does not exceed 99999999.99

POSLINK-658 Error not shown when entering number of bills on split bill by item function

Fixed issue if the number of bills > maximum bills setting on the function the error message was not shown
