

PosLink 1.0.3.170 Release Notes

06/09/2019

Release Summary

Enhancements

POSLINK-344 Ability to auto apply Pepper discounts

You can now set how Pepper automatic discounts apply. New option added to interfaces - > Pepper where you can select how you want to manage the discounts set to auto apply from Pepper.

POSLINK-669 Bill Manager settings moved to a new tab

The Bill Manager settings have moved to a new TAB in terminal configuration to make it easier to manage and configure.

POSLINK-689 Adjustments from 3rd Party apps record userID against them

When multiple users from 3rd party applications are added to a transaction and discounts are applied, the userid is recorded against that discount so when removing the user the correct discounts are also removed.

POSLINK-691 Student status to show on screen

When using function "270 - Verify customer" if more than 1 customer is on the transaction then the list displayed will now show the current status of each customer.

POSLINK-704 WorldPay Pay at counter installer

The WorldPay Pay At Counter installer has been updated to the latest version when using the engineer function 31 – Install WorldPay Pay At Counter.

POSLINK-709 Added new fields to JSON Output for 3rd Party Apps

The standard JSON output to update transactions for 3rd party apps such as 5Loyalty has been updated to include the BillPrinted Time. Also added vouchertype, vouchercode, userid, cardpointsused to the adjustment section in the JSON.

Fixes

POSLINK-506 WorldPay customer not present transactions failing

Fixed issue where WorldPay customer not present transactions were locking up the POS

POSLINK-657 PLU quantity can be overridden by numeric pad

Fixed issue when entering a quantity against a PLU on the numeric keypad and the PLU has a stock quantity enabled with disable on zero set then PLU will no longer go into negative.

POSLINK-667 Fractional Award Points on StockLink Loyalty Set as whole number Fixed issue with loyalty scheme if the point's value was fractional for example for every £1 award 1.5 points the calculation would be incorrect. Before this was rounding the 1.5 to 2.
