

PosLink 1.0.3.175 Release Notes

18/11/2019

Release Summary

Enhancements

POSLINK-869 Added NONE to bill manager receipt printing

Added new option to Terminal Configuration Flags3 Bill Manager Receipt Printer

POSLINK-856 Added eService EFT to EFT Devices

Added new EFT type eService to EFT Devices for Bank of Ireland PDQ integration

POSLINK-938 Allergens Error Handling

Changed the user message if the API service is not accessible and if there are no Allergens when pressing the Allergen Info function you now get a warning

POSLINK-926 Biometric Template Downloads

Changed the way the Biometric Templates are downloaded when sending clerks from StockLink so there is now only 1 API call and it will only respond with the changed data

Fixes

POSLINK-898 EFT Device Data Missing

Fixed issue when re-downloading EFT devices from PosLink was not populating the EFT Info

POSLINK-855 End Of Session Not Running Batch Report

If the End Of session fails it looks like it succeeded but the batch, report was not shown. Fixed issue where a missing error condition was not shown on a failure

POSLINK-964 Linekey Returned from JSON is incorrect for condiments

The JSON returned by Poslink was showing the incorrect linekey in the JSON file for condiments

POSLINK-947 JSON returned back from Poslink not formatted correctly

The JSON returned by Poslink was incorrect and had a trailing comma in the paymentitems section
